

DANISH DESIGN

The logo with the “double D” symbolises the unique world of design on every Danish Design watch.

The simple, elegant and non-obstructive characteristics are not only the forms of the DD models but also used materials. Steel, titanium, tungsten, anti-allergic PVD coated cases and mineral or scratch-resistant sapphire glasses will contribute to the comfort of wearing.

The chronograph function of a watch in combination with the right colours and case size and shape makes it look robust.

These gents fashion watches are made of anti-allergic black PVD. Available in silver or rose gold index. The round – stainless steel – version is 10 atmosphere waterproof and the square – titanium – version is 3 atmosphere. The explicit dial with date is visible through mineral glass.
