

DANISH DESIGN Martin Larsen series

Martin Larsen designed simple yet sculptural timekeepers. He was born in 1970 in Denmark and has a background in industrial design and mechanical engineering. After graduating from the Royal College of Art in London, he continued to work with various designers there before relocating to Copenhagen where he runs his own design studio.

Embracing his Scandinavian design roots, Martin Larsen is inspired by the potential of geometric forms. In his work he strives to explore the essence of materials and structures.

The Martin Larsen series are made from matted stainless steel with or without chronograph function. The watches are waterproof up to 5 atmosphere and covered with a mineral glass.

Red Dot Design Award 2008

This award is a renowned distinction for high design quality. Model number IQ12Q723 was awarded this prestigious prize.

The IQ12Q723 and IQ13Q723 have sapphire glass and a polished stainless steel case. They have a water resistance of 3 atmosphere.
